AUDITOR'S REPORT

To the Chairman and Members of the
Workers' Compensation Board, and

To the Minister of Labour
Province of British Columbia:

I have examined the balance sheet of the Workers' Compensation Board as at 31 December 1983 and the statements of income and expense and unfunded liability, changes in fund liabilities, changes in special reserve balances and changes in financial position for the year then ended. My examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as I considered necessary in the circumstances.

In my opinion, these financial statements present fairly the financial position of the Board as at 31 December 1983 and the results of its operations and the changes in its fund and special reserve balances and financial position for the year then ended in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

WORKERS' COMPENSATION BOARD
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 1983

Note 1 - Significant Accounting Policies

(a) Fund Accounting

Although the liabilities and reserves of the Board are allocated to the Accident and Silicosis Funds and various sub-divisions thereof, the assets are accounted for on a pool basis with no allocation of individual assets to specific funds.

(b) Fixed Assets

Fixed assets are recorded at cost, except for land acquired before 1970 which is recorded at appraised value. They are depreciated on a straight-line basis over their estimated useful lives as follows:

Buildings	20 or 40 years
Equipment	4 to 10 years
Furniture	10 years
Vehicles	5 years

(c) Investments

Investments are valued at amortized cost. The straight-line method of amortization is used. Capital losses or gains on the sale of bonds are charged against or taken into income in the year of the transaction.

(d) Fund Liabilities

The liabilities for unfinalled claims and pensions are calculated by the Board in accordance with assumptions and methods approved by the consulting actuary appointed by the Board. The report of the consulting actuary is appended to these financial statements.

(e) Unfinalled Claims

Provisions for future claims costs relating to injuries occurring prior to 31 December 1983 for which the final settlement has not been determined are credited to the unfinalled claims liabilities which are part of the Accident and Silicosis Funds established under Sections 39 (1) (c) and 41 (2) (b) of the Workers' Compensation Act. Wage loss

compensation and medical aid payments, and the capitalized value of pensions awarded after the year of injury (or after the year in which the claim is allowed, in the case of Silicosis), are charged to the respective unfinalled claims liabilities.

(f) Pensions

Capitalized values of pensions awarded are credited to the pension liability provisions, which are then charged with pensions paid. When a pension is awarded for an injury which occurred in the current year its capitalized value is treated as a current period expense. In the case of a pension awarded after the year of the injury (or after the year in which the claim is allowed, in the case of Silicosis), the pension is charged to the appropriate unfinalled claims liability.

(g) Special Reserves

The special reserves established pursuant to Section 39 of the Workers' Compensation Act are:

(i) Contingent Reserve [Section 39 (1)(b)] which provides a reserve in aid of industries or classes which may become depleted or extinguished.

(ii) Disaster Reserve [Section 39 (1)(d)] which provides a reserve to be used to meet the loss arising from a disaster or other circumstance which the Board considers would unfairly burden the employers in a particular class.

(iii) Enhancement Reserve [Section 39 (1)(e)] which provides a reserve for payment of that portion of a disability enhanced by reason of a pre-existing disease, condition or disability.

A determination is made by the Board of the amounts required to maintain these reserves at an adequate level. This "levy" is prorated to the various employer classes.

(h) Prior Years' Claims

All amounts recorded as "Provision for unfinalled claims" and as "Pensions awarded, capitalized values" are the actuarial estimates of the net present values of these liabilities. The calculation of net present value assumes that the annual rate of return on the Board's investments will exceed the annual increase in the Consumer Price Index (CPI) by 2 3/8%.

Each year, benefits paid by the Board are increased in line with the CPI and the actuarial assumptions are modified to include more recent experience. This results in a revaluation of the actuarial estimates made in prior years.

Investment income received or receivable during the year is allocated to the fund liabilities to offset the revaluation.

The amount by which the revaluation exceeds investment income allocated is described in the statements as "adjustment to prior years' actuarial estimates" and is treated as a current period expense.

(i) Assessment Income and Assessments Receivable

As a significant portion of assessment income for the year is not received until after year end, the amount shown is an estimate based on statistical data. Adjustments to this estimate are made in the following year.

Note 2 - Fund Liabilities

Under the provisions of the Workers' Compensation Act, the Board is required to provide capitalized reserves sufficient to meet the payments of compensation occurring in future years in respect of all injuries occurring during the year under the Accident Fund and all claims allowed during the year under the Silicosis Fund.

The Board's estimates of the required reserves (unfinalled claims and pensions) together with the special reserves exceed the funded reserves by $433,559,000 (1982 - $504,350,000).

Note 3 - Deposit Accounts

Certain employers have been placed by the Board in self-insuring or deposit classes and are required to deposit with the Board a sum of money determined by the Board.

They are billed on a monthly basis for compensation payments and pension awards made on their behalf, together with their proportionate share of administrative costs. The Board recognizes in its accounts both the current value of the estimated future payments for unfinalled claims and the amounts relative to these unfinalled claims to be received in the future from the deposit class employers.

The Board also acts as the agent of the Government of Canada for the payment of compensation to federal employees in British Columbia. Amounts disbursed are recovered from the Government of Canada on a monthly basis.

Note 4 - Fixed Assets ($000's)

Fixed assets are comprised of the following items:

	1983				1982
	Cost or Appraised Value	Depreciation	Accumulated Depreciation	Net Book Value	Net Book Value
Land*	1,350	-	-	1,350	1,350
Buildings	48,263	1,259	4,550	43,713	44,395
Furniture and Equipment	11,778	1,396	6,689	5,089	5,538
Totals	61,391	2,655	11,239	50,152	51,283

* Land - at cost	$ 994
- at 1975 appraised value	356
	$1,350

Note 5 - Superannuation Fund

The cost to the Board of its contributions to the Workers' Compensation Board Superannuation Fund for 1983 was $4,000,184 (1982 - $3,036,603).

An actuarial valuation of the Fund's liabilities was carried out in 1982 at the request of the Trustees of the Superannuation Fund. Based on the Plan as amended and ignoring liabilities and financing for indexed supplementary pensions, the Superannuation Fund's unfunded liability as at 30 September 1982 was approximately $24,000,000. This unfunded liability is not included in these financial statements.

Effective 1 January 1984, contributions by the Board have been increased so as to fund the unfunded liability over a 25 year period.

Note 6 - Comparative Figures

Certain 1982 comparative figures have been reclassified to conform with the financial statement presentation adopted for 1983.

ACTUARY'S REPORT

The Pension Liabilities for the Accident and Silicosis Funds are for pensions in effect as at December 31, 1983, but excluding pensions arising from injuries to Federal Government workers (Class 19). The present value of increases in pensions effective January 1, 1984 has been included in the Liabilities. The Pension Liabilities have been computed using the same mortality, net interest rate and other assumptions used for the valuation as at December 31, 1982. The net interest rate of 2-3/8% makes implicit provision for the future indexing of pensions on the assumption that interest earnings on Board assets in excess of 2-3/8% will correspond to future increases in the Consumer Price Index.

The Unfinalled Claims Liabilities for the Accident and Silicosis Funds are shown separately for rateable Classes and for deposit Classes (excluding Class 19), and are based on projections of future claims payments and awards using ratios developed from the Board's claims experience, average benefit rates, the net interest rate assumption of 2-3/8% and, where applicable, mortality, remarriage and other assumptions used for computing Pension Liabilities. The methods used in calculating these liabilities were substantially the same as those employed in the previous valuation as at December 31, 1982.

The liabilities included in this report have been computed by the Board in accordance with methods and assumptions approved by us. We have made such tests of the calculations as were deemed necessary. We have also examined the data upon which the calculations were based and found it to be sufficient for our purposes and consistent with the Board's financial statements.

In our opinion, the amounts set out below, which have been determined by the methods and assumptions described above, make reasonable provision for the future liabilities of the Board as at December 31, 1983 subject to the Board levying assessments in future years sufficient to provide for any Consumer Price Index related increases in benefits that are greater than those which can be provided from interest earned on Board assets in excess of the valuation net interest rate of 2-3/8%.
